

Phillip Loske

Philipp came from Germany to volunteer for Jatan. After finishing his secondary school education in summer 2010 he decided not to put his own career in the first place but to spend a gap year in a social service abroad before enrolling in University. Philipp worked in Jatan from September 2010 to August 2011. His main focus in Jatan has been maintaining the website and working for the 'Apna Jatan Centre' but also he supported Jatan in many other ways,

such as designing the Annual Report. He really enjoyed living in India for a year, meeting so many different people and he soaked up a lot of the Indian culture. "He became a real Indian", said Dr. Kailash Brijwasi about his first long-time intern.

Phillip learnt a lot and he is certain that spending a year abroad and experiencing something so different from home has been the absolutely right choice and will have a major influence in his future life.
